

A SOUTH AFRICAN SECRET

SOUTH AFRICA'S BEST KEPT SECRET

A few years ago a famous TV show-host made a humorous advertisement for plain water in a cardboard box. At the time she did not know that hospitals were in dire need for a simple solution to give recovering patients a simple drink of water. A small box with a bent straw went viral and millions of boxes were sold. More importantly thousands of patients were helped even if it was only in a small way, just because one TV show-host helped to spread the word that the product existed.

10 years ago we started developing a number of product solutions to help heal the stresses and strains that our clients are encountering. We have solutions that give our clients an immediate competitive edge.

Products developed and supported in South Africa. A secret that remained unrevealed. But for us to actually help our customers we need people, like the TV show-host, to reveal this secret. To help us get to the people that really and truly need our help.

Although we are not selling boxes of water our products have a large impact on all our clients as we get to the heart of most IT support issues. Namely the turnaround time to solution delivery and the ability to be self sufficient with existing resources and infrastructure.

Help us reveal our South African secret
